Organization : ASI
Country : Austria
Project ID : 00027757/0001 | Project Established
ICS : 13.280, 13.300
National Ref : ÖNORM D 2305
Title : Decontamination of individuals after CBRN incidents - Requirements for on-scene emergency decontamination

Scope : This Austrian standard specifies a procedure for emergency decontamination of individuals affected by a CBRN incident. Definitions of required terms are provided. Guidelines for immediate response measures to be provided by the emergency responders first on scene (before the arrival of specialised relief units or equipment) are established for use. This Austrian standard is part of an inter-organisational concept to ensure a seamless care for affected persons while building on existing regulations, in particular the fire-fighter strategies against hazardous materials and the rescue service guidelines for patient care.

Title : Energy audits - Guidelines for energy audits of buildings
Scope : This technical report constitutes a guideline for the application of UNI CEI EN 16247-2 on the energy audits of buildings.
This technical report constitutes a guideline for the performance of energy audits of buildings (for residential, tertiary or other similar purposes).
This technical report provides indications and operating methods for:
- collection and analysis of energy costs;
- the collection and analysis of the available technical documentation and the definition of the controls and of the building and plant inspections;
- the definition of the adjustment factors of the billed consumption;
- analysis of energy services;
- the construction of the energy inventory;
- calculation of energy performance indicators;
- identification of actions to improve energy efficiency;
- cost-benefit analysis;
- evaluation of the priority of the interventions.

Title : Labels for matrasses
Scope : Sustainablity and circularity are becoming more and more important. One of the great challenges is to fit in the production of matrasses in the transition agenda. The first step is to make the composition of the matrasses transparent. This is important for the recycling business. This NTA determines agreements to stipulate the matrasses composition in a uniform way..

Title : Provisions for the installation of stationary pressure vessels for the storage of gases
Scope : This Austrian Standard shall be applied to the installation of stationary pressure vessels with a pressure-volume product over 3000 bar for the storage of gases or gas overlaid ingredients which are subject to the Act on Pressure Vessels. Concerning the installation of pressure vessels intended for storage of LPG for burning purposes according to ÖNORM C 1301, the present Standard is only applicable for a vessel volume exceeding 13000 litres.
Hereinafter, these pressure vessels are considered including their equipment necessary for operation and referred to shortly as ¿vessels¿.
For vessels with a lower pressure-volume pressure, this standard can be applied analogously.
Product evaporators and buffer vessels are not used for the storage of gases according to this Standard and are, therefore, not covered by the scope of this ÖNORM.
For the installation of vessels for deep frozen liquefied gases, the additional relevant requirements of ÖNORM EN ISO 21009-2 and/or the requirements of ÖNORM EN 14197-3 apply.
The requirements of the present ÖNORM shall be applied to deep frozen liquefied gases only if they are not in contradiction with the requirements of the European Standards mentioned above or if they are declared mandatory by national provisions.

National Ref : ÖNORM V 5750
Title : Cargo securement - Methods
Scope : This Austrian Standard (ÖNORM) specifies methods for securing loads on transport vehicles in road, rail and ship traffic against the forces occurring during transport. It should provide those responsible for loading and transport with basic information and recommendations for the safe connection between cargo and means of transport. However, this ÖNORM can also be applied analogously, for example, to the formation of loading units (stowing in containers, securing pallet loads).
