 National Ref : NS 3691-2
 Title : Evaluation of reclaimed timber - Part 2: Impurities
 Scope : This document provides provisions for the evaluation of purity related to reclaimed wood. Evaluation involves a mapping of impurities. The categories and test methods described in this document may be inadequate for further use where there are special requirements for purity, such as panel production. Such use will often require special measures. For some applications impurities may be desirable. This document does not address desirable impurities.

Title :	Protection of Air Purity - Determination of Nitrilotriacetic Acid and Its Salts at Workplaces by High-Performance Liquid Chromatography with Spectrophotometric Detection		
Scope :	This standard describes a method for determining nitrilotriacetic acid (CAS: 139-13-9) and its salts in workplace air using high-performance liquid chromatography with spectrophotometric detection. The method is intended for use during hygiene and sanitary control. The lowest measurable concentration of nitrilotriacetic acid under the specified sampling and determination conditions is 0.15 mg/m ³ (for an air volume of 180 L).

Title :	Air purity protection - Determination of enflurane in workplaces by gas chromatography with mass spectrometry	
Scope :	This standard gives a method for the determination of enflurane (CAS: 13838-16-9) in workplaces air by gas chromatography with mass spectrometry. The method is applicable during control of the hygienic-sanitary conditions. The lowest concentration of enflurane which can be determined by the method in the sampling and determination conditions specified in the standard is 2 mg/m³ (for air volume 5 l).
